Contents

Introduction **1**

1 Prevarieties **7**
Affine algebraic sets . . . 8
Affine algebraic sets as spaces with functions . . . 17
Prevarieties . . . 23
Projective varieties . . . 26
Exercises . . . 36

2 Spectrum of a Ring **41**
Spectrum of a ring as a topological space . . . 42
Excursion: Sheaves . . . 47
Spectrum of a ring as a locally ringed space . . . 58
Exercises . . . 63

3 Schemes **67**
Schemes . . . 67
Examples of schemes . . . 73
Basic properties of schemes and morphisms of schemes . . . 76
Prevarieties as Schemes . . . 80
Subschemes and Immersions . . . 85
Exercises . . . 90

4 Fiber products **95**
Schemes as functors . . . 95
Fiber products of schemes . . . 99
Base change, Fibers of a morphism . . . 107
Exercises . . . 117

5 Schemes over fields **121**
Schemes over a field which is not algebraically closed . . . 121
Dimension of schemes over a field . . . 123
Schemes over fields and extensions of the base field . . . 136
Intersections of plane curves . . . 141
Exercises . . . 144

6 Local Properties of Schemes **148**
The tangent space . . . 149
Smooth morphisms . . . 156
Regular schemes . . . 161
Normal schemes . . . 165
Exercises . . . 167

7 Quasi-coherent modules **172**
Excursion: $\mathscr{O}_X$-modules . . . 172
Quasi-coherent modules on a scheme . . . 184
Properties of quasi-coherent modules . . . 193
Exercises . . . 203

8 Representable Functors **208**
Representable Functors . . . 208
The example of the Grassmannian . . . 213
Brauer-Severi schemes . . . 222
Exercises . . . 225

9 Separated morphisms **230**
Diagonal of scheme morphisms and separated morphisms . . . 231
Rational maps and function fields . . . 236
Exercises . . . 242

10 Finiteness Conditions **244**
Finiteness conditions (noetherian case) . . . 245
Finiteness conditions in the non-noetherian case . . . 252
Schemes over inductive limits of rings . . . 261
Constructible properties . . . 273
Exercises . . . 281

11 Vector bundles **288**
Vector bundles and locally free modules . . . 289
Flattening stratification for modules . . . 299
Divisors . . . 301
Vector bundles on $\mathbb{P}^1$ . . . 316
Exercises . . . 319

12 Affine and proper morphisms **324**
Affine morphisms . . . 324
Finite and quasi-finite morphisms . . . 328
Serre's and Chevalley's criteria to be affine . . . 338
Normalization . . . 343
Proper morphisms . . . 347
Zariski's main theorem . . . 354
Exercises . . . 366

13 Projective morphisms **370**
Projective spectrum of a graded algebra . . . 371
Embeddings into projective space . . . 389
Blowing-up . . . 410
Exercises . . . 423

14 Flat morphisms and dimension **428**
Flat morphisms . . . 428
Properties of flat morphisms . . . 436
Faithfully flat descent . . . 446
Dimension and fibers of morphisms . . . 470
Dimension and regularity conditions . . . 479
Hilbert schemes . . . 484
Exercises . . . 487

15 One-dimensional schemes **491**
Morphisms into and from one-dimensional schemes . . . 491
Valuative criteria . . . 493
Curves over fields . . . 497
Divisors on curves . . . 501
Exercises . . . 506

16 Examples **508**
Determinantal varieties . . . 508
Cubic surfaces and a Hilbert modular surface . . . 525
Cyclic quotient singularities . . . 534
Abelian varieties . . . 538
Exercises . . . 545

A The language of categories **547**

B Commutative Algebra **554**

C Permanence for properties of morphisms of schemes **582**

D Relations between properties of morphisms of schemes **585**

E Constructible and open properties **587**

Bibliography **592**

Detailed List of Contents **597**

Index of Symbols **607**
